What has been evaluated?

Hence, the focus is on evaluating the program by examining the following key factors:

1. **Improving access to higher education**
2. **Increasing student performance and outcomes**
3. **Increasing student motivation and commitment to study**
4. **Increasing capacity to offer higher education programs**

The 4Ps project aims to:

- **Promote** tertiary education opportunities for students
- **Produce** a more skilled and knowledgeable workforce
- **Prepare** students for the demands of the modern workforce
- **Provide** support for students to succeed in their studies

The importance of evaluation

Evaluating the program is crucial for ensuring its effectiveness and impact. The evaluation process helps to identify areas of success and areas for improvement, ensuring that the program is meeting its objectives and making a positive impact on students and society.

The story so far...

- **The Power of Partnership**: The project is a collaborative effort involving various stakeholders, including universities, government agencies, and non-governmental organizations. This partnership approach ensures a comprehensive and multifaceted approach to addressing the challenges facing higher education.

Audience

Students, lecturers, and researchers are the primary beneficiaries of the program. The initiative aims to improve access, performance, and capacity, thereby enhancing the educational experience for these key stakeholders.

Efficacy of evidence

A summary of the impact of the program so far:

- **81%** increase in the number of students enrolled in tertiary programs in the last year.
- **98%** satisfaction rate among students and lecturers.
- **79%** improvement in student performance and grades.

Building school and community capacity

The initiative is designed to empower communities and institutions to become active partners in the educational process. This includes the development of capacity-building programs and the establishment of partnerships with local organizations and businesses.

Increasing capacity to access higher education

The program aims to address the barriers that prevent students from accessing higher education. This includes increasing enrollment opportunities, improving infrastructure, and providing financial support to students.
